BUSE @2025: Celebrating Growth, Partnerships, Academic and Innovation Excellence

REFLECTING ON A YEAR OF EXCELLENCE

A message from the Vice Chancellor

As the sun sets on 2025, Bindura University of Science Education (BUSE) stands tall, as a beacon of higher learning and a dynamic catalyst for national growth, innovation, and collaborative spirit, truly embodying the University's Silver Jubilee theme: "BUSE @ 25: Celebrating Growth, Partnerships, Academic and Innovation Excellence."

As we celebrated BUSE's Silver Jubilee this year, our celebrations marked a profound moment, recognising 25 years of transforming education in science and technology, but more importantly, 25 years of building bridges and fostering ideas that drive Zimbabwe forward, aligned with the now ending National Development Strategy 1 and in much anticipation of the just unveiled National Development Strategy 2.

This year has been a testament to our resilience, innovation, and unwavering commitment to shaping the future of science and technology education in Zimbabwe and beyond.

Indeed, this has been a Year of Boundless Growth.

Reflecting back at BUSE's first cohort in 1996 to becoming a leading state university, BUSE's journey has been one of relentless expansion, both in scope and impact.

2025 witnessed unprecedented faculty expansion, research breakthroughs, and student success stories that speak volumes about our collective dedication to excellence.

The BUSE Innovation Hub buzzed with energy as it showcased ground-breaking student led projects and prototypes that promise to tackle real-world challenges.

This wasn't just a showcase; it was a powerful demonstration of how BUSE nurtures creativity, turning innovative ideas into tangible contributions to society. Of note was the triumphant journey of BUSE ENACTUS who won second place at the ENACTUS World Cup in Bangkok, Thailand.

Our Silver Jubilee Research and Innovation Week was a testament to powerful collaborations, bringing together government, industry, and academia.

The enthusiastic support from officials, including representatives from the Ministry of Higher and Tertiary Education, Innovation, Science, and Technology Development, Zimbabwe Council for Higher Education and Research Council of Zimbabwe among other critical partners, highlighted BUSE's crucial role in co-creating solutions and fostering industrial growth.

The recently held Presidential Innovation Fair and Awards ceremony gave due recognition to BUSE's efforts in technological advancement, innovation, and industrialisation.

The Fair saw one of BUSE's most brilliant minds being awarded the Best Early Career Innovator Award for the Prodent Herbal Biorepair Mouthwash.

REFLECTING ON A YEAR OF EXCELLENCE

● Continued from previous page

BUSE's Monitoring and Evaluation Dashboard, Chiringa - won second place in the Best Innovation in ICT category.

The Zambezi Valley Masawu Value Addition Project was awarded second place in the Best collaboration between Academia and Industry category.

To put the cherry on the cake, BUSE was a nominee for the Best Innovating University for 2025.

The successful hosting of the 24th Graduation and Commissioning ceremonies of the Palpo Plant, Industrial Park and University entrance; 4th Vice Chancellor's Golf Tournament; 4th International Conference on Science Education and Technology; the 2025 Annual General Meeting; 20th Vice Chancellor's Sports Tournament; Business Stakeholder Engagement Meetings; Webinars and the numerous high-end conferences and events undertaken in the year are success stories profoundly embedded in the University's every growing history and legendary place on the higher education terrain.

Let the stories within these pages inspire us to deepen our partnerships, challenge the status quo in our research, and continue creating a future where science, technology, and innovation lead Zimbabwe to greater heights.

BUSE is not just educating; we are shaping and creating the future, one innovator, one partnership, one breakthrough at a time.

We owe our success as BUSE to all our staff, students, stakeholders and alumni. Chief amongst all, we are indebted to the Government of Zimbabwe and sterling leadership of the Ministry of Higher and Tertiary Education, Innovation, Science and Technology Development for the continued support and guidance over the past year.

As we look to the future, BUSE remains dedicated to fostering critical thinking, practical skills, and a passion for discovery.

We aim to strengthen partnerships, expand our

technological resources, and continue producing educators and innovators who will drive national progress.

To our students, faculties, staff, and partners, thank you for a year of dedication and achievement. Let's carry this momentum forward as we continue to build a brighter, science-driven future.

As we lay to rest 2025, we carry forward the spirit

of hard-work, commitment and endurance. The many successful stories and memories made in 2025 remain our shining light and inspiration for an even better year ahead.

On behalf of Bindura University of Science Education and on my own behalf, I heartily wish you all a blessed Christmas and exciting 2026.

Happy Reading!

BUSE HONOURS STAFF

Bindura University of Science Education (BUSE) hosted its highly anticipated Annual Staff Christmas Luncheon and Recognition Awards Ceremony, an event meticulously designed to honour the tireless dedication of its workforce and boost morale.

Staff members from academic, administrative, and support departments gathered as one BUSE family for a sumptuous buffet meal, a generous gift from the University administration to all its employees.

The highlight of the afternoon was undoubtedly the Recognition Awards Ceremony, where the University presented long-service awards to stalwarts who have helped shape the institution's journey. Each award symbolised the passage of time, and years of accumulated knowledge, shared experiences, and an unwavering dedication to the BUSE vision.

Special awards were also presented to individuals for outstanding achievements in various fields, with the Employee of the Year Award for University Construction Projects going to Mr Felix Kamutando, while the administrator of the year award went to Dr Judith Mwenje.

Other awards went to Dr Divaris C. Jaravaza for Emerging Publisher; Dr Paul Mukucha, Established Publisher; Messrs Leo Hassan Ali, Liberty Mashonganyika, Revelation Mudoti, Ms Clara Chagonda, Mr Callisto Rugora and Ms Marvellous Goredema scooping the Outstanding Innovation and Industrialisation Award; Dr Chamunorwa Nyoni, Dr Mwenje, Dr Lazarous D. K. Dokora and Prof. Ronald Manhibi got the Impactful Community Engagement Awards with Mr Samson

Magunga, Mr Joram Marange and Mr Allan Gwata getting the Employee of the Year award.

Presiding over the celebrations, Vice Chancellor Professor Eddie Mwenje, said celebrating employee accomplishments was a way the university reaffirmed its pledge to continue improving the conditions that allow staff members to excel both professionally and personally, describing them as the most valued asset of the institution.

"Today is more than a luncheon, it is a tangible expression of our profound gratitude," said Professor Mwenje.

"The engine of any great university is its people. Your diligence, your creativity, and your spirit are what transform BUSE from a mere institution into a dynamic community of learning and innovation. These awards, especially those honouring decades of service, tell a story of resilience, growth, and shared purpose."

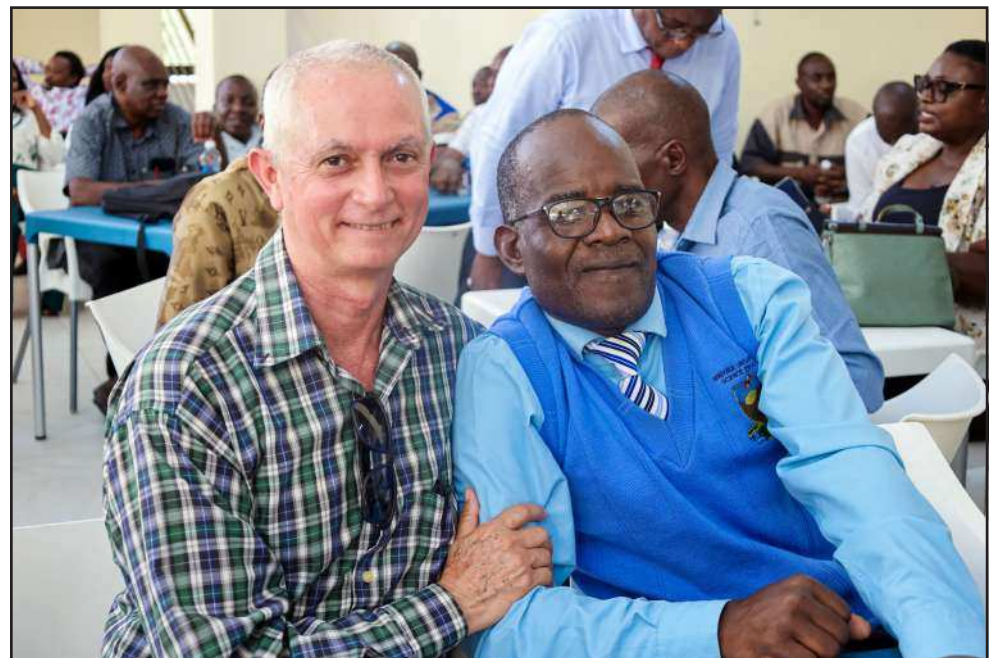

He said investing in employee welfare and recognising their achievements is not merely a seasonal gesture but a strategic imperative for boosting morale and fostering an environment where everyone can thrive.

The ceremony acknowledged past contributions and also energised the workforce for the year ahead. It was a powerful reminder that at BUSE, the people who teach, research, administer, and maintain the campus are truly seen, valued, and celebrated.

The University extends its congratulations to all award recipients and its warmest seasonal greetings to every member of the BUSE family. Here's to a prosperous New Year, built on the strong foundation of a recognised, motivated, and united community.
